Jive for Small Business

Ease of Use

Control and update your system in real-time from any Internet-enabled device using Jive's online portal.

Diverse Hardware

Jive works with various IP phones and handsets. Diversify your hardware with cordless handsets or headsets to improve your mobility.

Live status Wallboards

Publicly display real-time information related to your call queues and staffing priorities.

Affordable Price

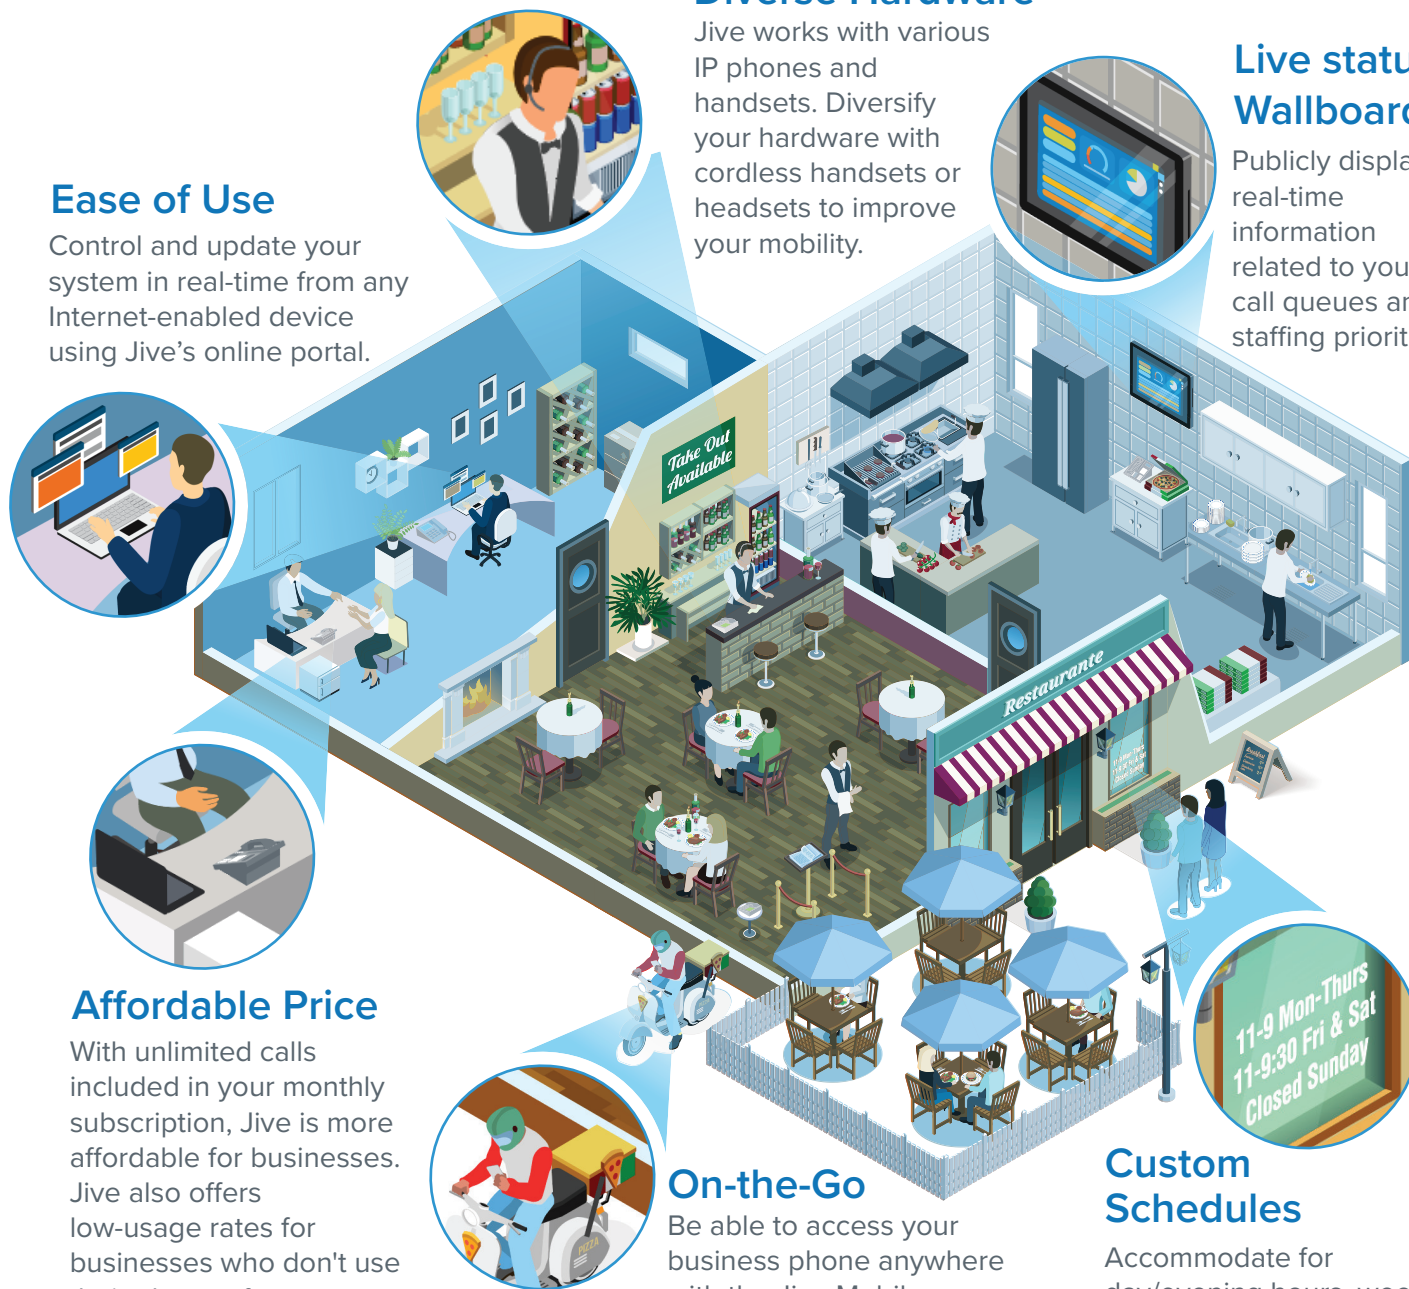

With unlimited calls included in your monthly subscription, Jive is more affordable for businesses. Jive also offers low-usage rates for businesses who don't use their phone often.

On-the-Go

Be able to access your business phone anywhere with the Jive Mobile app and never have to give your personal number out again.

Custom Schedules

Accommodate for day/evening hours, weekend hours, or holidays by creating time-based routing and custom schedules.

Power Your Business with Enterprise Features at an Affordable Price

Jive's Hosted VoIP phone system provides enterprise-grade features for an affordable price. With our phone system you can leverage your phones to increase business productivity and efficiency.
